

6 June 2013

Press Release

Newmark Security plc

("Newmark" or the "Group")

Pre-close trading update

Newmark Security plc (AIM: NWT) a leading provider of electronic and physical security systems, is pleased to provide the following pre-close trading update for the year ended 30 April 2013.

The Group's trading in the second half of the year has continued to be encouraging, benefiting from a number of contracts previously announced, particularly in its asset protection division. Whilst certain of these are multi-year contracts, a significant proportion of equipment procurement occurred in the year ended 30 April 2013 resulting in stronger than expected revenue in the year. As is common with such contracts, the speed of branch roll-out is at the discretion of our customers; consequently the timing of revenues recognised by the Group can vary against management's original expectations.

Overall, the Directors believe Group revenue for the year ended 30 April 2013 will be not less than £18 million (2012: £13.1 million) with a material improvement in the trading profitability against prior year.

Marie-Claire Dwek, Chief Executive Officer, commented "we have been very pleased with our trading in the year to April 2013, but are mindful that a number of larger contracts, the benefit of which has partly fallen into the financial year just gone will not necessarily be replicated in the current financial year. However these contracts should benefit the profitability of the Group in future years".

The Board expects to recommend a dividend at the time of the publication of the final results for the year ended 30 April 2013.

- Ends -
