NEWMARK SECURITY PLC

("Newmark" or the "Group")

UPDATE

Launch of Sateon Advance, GT-10 and Alliance

Newmark Security Plc (AIM:NWT), a leading provider of electronic and physical security systems, is pleased to announce the launch of its Sateon Advance access control system ("Sateon Advance") and GT-10 Android based terminal for workforce management ("GT-10"), under subsidiary Grosvenor Technology's brand. Additionally, the Board is pleased to announce the launch of Alliance, a programme to provide opportunities for Newmark's partners to mutually benefit.

Sateon Advance is an innovative modular approach to access control, designed by a trusted vendor with over 25 years' experience of delivering access control solutions. A unique family of smart "controllers" support plug-in expansion modules or "blades", minimising cable runs and allowing users to customize or expand the capacity of a system by simply snapping additional blades into place. At launch, two types of blade are available: supporting access control and smart building management. Innovation in both the hardware and software enable doors to be configured 25% faster than the closest competitors' products known, while also significantly reducing both the cost and space required for a typical installation.

GT-10 is an Android based workforce management solution. The GT-10 Identi-Hub combines decades of experience in the workforce management market with the inter-operability of the Android platform and the flexibility of a responsive 10" multi-touch screen usually found only in premium consumer tablets. This innovation enables integrators to lower costs and increase productivity by sharing applications across mobile and fixed terminals while retaining Grosvenor Technology's reputable always-on reliability. Going beyond traditional capabilities of a time and attendance clock, GT-10 delivers the flexibility of an open operating system, meaning that HTML 5 solutions – either off-the-shelf, or bespoke – can be easily deployed instantly. The GT-10 will help organisations redefine employee self-service and engagement, not just for the HR department but across the organisation.

Alliance is a new partner programme from Newmark which offers commercial, marketing and technical support to its partners, rather than an arbitrary rebate offered by most manufacturer loyalty schemes. The partnership is designed to complement Grosvenor Technology's partners and customers with tools and resources they may lack, in order to grow for mutual benefit.

Marie-Claire Dwek, Chief Executive Officer of Newmark said: *"I am thrilled to be able to update the market on these new developments coming from our Grosvenor Technology arm. Newmark's goal is to be the manufacturer of choice in the industry, not by locking our partners in, but by offering the most advanced technology on the best commercial terms. As such we look to ensure that our systems are adaptable and easy to use. We believe the flexibility offered by these new systems is peerless in the market and saves our partners time and money.*

"In addition to this we hope to demonstrate our commitment to partners by offering comprehensive support as well as access to the tools and collateral necessary to win more projects. We understand this goes beyond anything offered by our competitors. We are dedicated to growing the market as a whole through mutual growth with our partners. It's not just about individual products but about ensuring that an ecosystem of businesses can come together in partnership to grow the industry, and this ambition is captured perfectly by Alliance."

Newmark Security Plc

Newmark Security PLC is a leading provider of electronic and physical security systems, which focus on personal security and the safety of assets. Operating through two established and wholly owned divisions, Grosvenor Technology (Electronic) and Safetell (Physical Security), the Group listed on AIM in 1997.

Grosvenor Technology provides state of the art access control and data acquisition systems delivered via its reputable JANUS access control platform and its CUSTOM brand data-collection terminals. The next generation and recently launched Sateon software is a new and innovative access control concept which delivers all the features of a software based system but in the cloud which combines the advantages of a software based system with cloud technology to improve lifecycle cost, install speed and allow for instant maintenance from anywhere in the world. Grosvenor Technology clients include BAE Systems, UK Air Traffic Control, BSKYB, Merrill Lynch, Bank of America, M & S, Morrisons, Tesco, Network Rail, government departments and many universities. More information can be found at www.grosvenortechnology.com

Offering personnel and asset protection since 1987, Safetell is the UK's leading provider of fixed and reactive security screens, reception counters, cash management systems and associated security equipment. Safetell's customers range from leading blue chip organisations to single sites including banks and building societies, police forces and the Post Office, local authorities and government departments, forecourt retailers and supermarket chains.
